

## **NEW PROJECTORS AND SCREENS ARE ON THE WAY!**

New digital projectors and screens will be installed this fall at St Tim's. The new system will feature two digital projectors suspended from the ceiling about 30' in front of the screens. The screens are composed of HD material, and will stretch to 133" diagonally. They will be installed over the existing screens, so no alterations will be made to the walls. The new system is necessary because the 20+year- old projectors are failing. In researching this we discovered that new projectors are not compatible with the dimensions of the old screens, so we needed to either replace the entire system or discontinue using projectors and screens entirely. The new system should provide better clarity, resolution, and overall visual accessibility throughout the worship space. Installation should be completed later this fall. The entire project will cost \$45,000, which will come primarily from our cash reserves. If you would like to make a contribution to help off-set the cost against reserves, you are welcome to do so! Contributions can be mailed to the parish office or dropped in the regular collection basket at weekend masses. Checks should indicate on the memo line that the contribution is designated to the Projector/Screen Project, or cash contributions should include your name and envelope number so that we may add that credit on your year-end statement. We will inform you as the installation dates are confirmed and planned. We hope this will enhance our celebration of the Eucharist and other parish events for many years to come!
